## SUMMARY

Full-stack developer work in **Next.js, TypeScript, and Tailwind, WordPress, and Flutter** for cross platform application. Experience with **MySQL, PostgreSQL, and Firebase**. I mentor developers, providing key UX/UI critique in online communities.

## EXPERIENCE

### Freelancer

#### Dr. Aram Bakhtiar portfolio

October 2025 - November 2025, Erbil

- Engineered and implemented SEO best practices, achieving a performance ranking of 95%, and integrating map functionality for clear address display.
- Developed and deployed** a professional portfolio platform using WordPress and Elementor, enhancing the practice's digital presence and authority.
- Structured the content** to clearly detail the doctor's specific medical expertise, professional summary, and qualifications.
- Designed the user interface** to provide clear access to contact forms, phone numbers, and current office/clinic hours, focusing on optimal user experience (UX/UI).
- You can visit via this link <https://draram.com>.

### Freelancer

#### Rekan Group

Nov 2024 - January 2025

- Modernized entire tech stack from unmaintained PHP 2015 to secure and scalable web architecture in Next.js/TypeScript, eliminating 15+ security vulnerabilities.
- Fixed critical business issues including broken SEO and converted a broken 2-language system into a fully functional 3-language (Kurdish, English, Arabic) platform.
- Built secure headless CMS enabling full content control, reducing update time by 90% for non-technical team.
- Secured infrastructure with Cloudflare integration, blocking DDoS attacks and 1000+ malicious requests every month.
- Delivered complete ownership - client controls domain, hosting, and code, eliminating unreliable third parties.
